

# Protein Production in Both 293 and CHO Cells

## Superior Protein Yield and Quality BrPERfect® for Protein DNA Transfection Reagent

- **Novel Tech:** Utilizes innovative **BIODEGRADABLE** polymers, distinctly different from PEI
- **Superior Yield:** Achieves significantly **HIGHER** protein yields compared to its main competitors
- **Cost-Effective:** Requires only **0.5 mL per Lite Cells**, saving costs for both 293 and CHO systems
- **Stable:** Transfection complex remains stable from **2 MINUTES to 2 HOURS** (at room temperature), ideal for **scaling up and high-throughput** operations
- **Easy and Consistent:** No need for gentle mixing or precise timing, just a **SIMPLE QUICK MIX** for high batch consistency

Product	Part No.	Reagent Size
BrPERfect® for Protein DNA Transfection Reagent	100006P-1	1 mL
	100006P-20	20 mL
	100006P-100	100 mL
